are now available from
*Advanced Storage and
Retrieval Systems*
of Marietta, GA**

Rotomat® Vertical Carousel
Bring the goods to the user to save time

Hänel Storage Systems

Lean-Lift® Vertical Lift Module
Store vertically to save 75% of floor space

Hänel Storage Systems (Pittsburgh, PA) is proud to announce the addition of **Advanced Storage and Retrieval Systems (ASRS)** to the Hänel family of dealers.

ASRS is owned by Jack Chynoweth who has more than 35 years experience in the materials handling industry. The company has been serving customers throughout the Southeast since 2001, covering major metropolitan areas including Atlanta, Asheville, Augusta, Chattanooga, Columbus, Greenville, Knoxville, Macon, Savannah, Spartanburg and Tri-Cities, TN among others.

The Hänel product line brings over 50 years of automated vertical storage manufacturing expertise to ASRS. Our Rotomat® Carousel and Lean-Lift® VLM can free up to 75% of your floor space, making room to add additional inventory, new profit centers or expanded production under the same roof without the cost of new construction.

Hänel's advanced controllers and Hänel-Soft® inventory management software can manage all of your inventory with accuracy up to 99%, while increasing security and lowering operating costs.

Contact ASRS today to schedule a free, no-obligation survey of your site and learn what automated vertical storage from ASRS and Hänel Storage Systems can do.

Proven solutions for materials handling & storage
